2026 ASA South Florida High School Data Challenge

Deadline: 11:59pm EST, February 20, 2026

Who Can Join? Any high school student worldwide—no prior modeling experience required. Participation may be individual or in teams of up to 4.

What You'll Do: Work with real health and nutrition data and explore patterns.

Two Ways to Participate: Prediction Track (predict HDL cholesterol) or Visualization Track (create charts and explain findings).

What to Submit: Prediction—pred.csv + short report (≤4 pages); Visualization—1–4 page PDF with at least two charts.

Why Participate? The winning team will receive **$150** and present their project as a poster at the [2026 American Statistical Association (ASA) Florida Chapter Meeting](). The **top 20%** of teams will earn certificates of recognition.
